

**Vertical Packaged Terminal Air Conditioning (PTAC) for:
New Construction or Property Renovation**

For Sales assistance call, 877-782-2289 / 877-PTAC-BUY

Optional Room Cabinet

MADE IN USA

Description:

Adirondack-Aire 'PIN' Series is a small footprint **vertical configuration thru-the-wall** air conditioning system or heat pump (PTAC/PTHP) for **new construction** or **property renovation**. This highly flexible design typically fits into the **corner of a room** and serves one or more **zones/rooms**. A complete system consists of the chassis, a wall sleeve with outdoor louver, factory or site built room cabinet with return air panel, wall thermostat, flex duct and supply air grille. The room cabinet may be either a **factory-supplied** floor to ceiling **steel cabinet** with powder coat finish or a **site built closet** with factory available return air/access panel. This design provides a barrier between the unit and room occupants thereby **minimizing sound levels**. The ducted air delivery system

maximizes comfort. Proven technology, quality components, careful design and testing, and the latest in reliability and efficiency advances assure long life, user satisfaction, and lower energy cost! Add to this features that include: **Rust-Block*** corrosion protection system, **slinger condenser fan**, evaporator **freeze protection**, and **evaporator fan post purge** control... and *Adirondack-Aire* is the choice the competition can't match. *Cold Point Corp.* backs the 'PIN' with a customer friendly **one-year parts and labor** warranty and **five-year compressor** warranty, (see *Warranty* document for details). **Heat pumps** are available and include a **thermostatic expansion valve**, **suction accumulator**, **compressor crankcase heater** and condenser **drain pan valve**. Heat pump heating is **single stage** operation. Manual fresh air damper is standard on all models. The standard 1" disposable fiberglass air filter is chassis mounted.

Application & Benefits:

The *Adirondack-Aire 'PIN'* series vertical PTAC/PTHP offers the **ease of installation, simplicity, and flexibility** of a PTAC but offers major advances for in room **quiet, comfort, and occupant satisfaction**. The small footprint of this unit maximizes usable room space. The conventional **wall thermostat control** eliminates confusing buttons and dials and improves **temperature control** and occupant comfort. A **slinger ring** condenser fan provides a **blow-thru** airflow pattern that re-evaporates condensate **eliminating** the need, cost, and maintenance of **internal drains**. The standard evaporator freeze protection stops unit operation **before damage occurs** should airflow become reduced or obstructed due to dirty coils, obstructed airflow, or motor failures or lock-up. Evaporator blower **post purge** control improves **system efficiency**. Condensate **re-evaporation** and the *Rust-Block* system assure a **stain-free** building exterior. High efficiency compressors provide demonstrated **reliability** and **low sound** levels. The outdoor louver is an **architectural style** fabricated using **rust-free clear anodized aluminum** components. A round duct connection collar is provided for connection to flex duct (see illustration and dimensional detail). The standard manual fresh air damper introduces fresh air to the room.

Options/Accessories:

- Heat Pump
- Room Cabinet with Powder Coat
- Electric Heat
- Chassis Stand
- Motorized Fresh Air
- Return Air/ Access Panel
- Wall Thermostat
- Internal Drain
- Wall Sleeves
- Louvers
- Control Options
- Line Cord

* **Rust-Block** corrosion protection system consists of:
•Heavy gauge G90 rated **galvanized steel** construction

•**Plastic** or **Aluminum** Condenser Fan
•**Stainless steel** compressor and condenser motor studs

•**Powder painted drain pan**
•**Magnaguard** and/or **stainless steel** screws and fasteners

Standard Features

- 1). Made in USA
- 2). Designed for easy installation & minimum footprint
- 3). Exclusive **Rust-Block corrosion protection**
- 4). High efficiency PSC type fan motors w/built-in temperature protection
- 5). ETL APPROVED
- 6). Quiet, durable, and efficient compressor with built-in pressure & temperature protection
- 7). Heavy Gauge G90 galvanized steel construction
- 8). Manual Fresh Air Damper
- 9). High efficiency copper tube-aluminum fin evaporator and condenser coils
- 10). Slinger ring axial condenser fan
- 11). Chassis mounted disposable 1" fiberglass air filter
- 12). Condensate re-evaporation
- 13). Evaporator fan post purge control
- 14). Frost free low ambient cooling*
- 15). Refrigerant circuit access ports
- 16). Heat pump heating to 35°F outdoor** (single stage)
- 17). Capillary expansion. Thermostatic expansion valve (heat pumps)
- 18). Positive shift reversing valve (heat pumps)
- 19). Suction Accumulator (heat pump)
- 20). Precision charged with R-22 refrigerant
- 21). Compressor crankcase heater (heat pumps)
- 22). Built in anti- short cycle timer (heat pumps)

*Cooling operation locks-out at 34° F outdoor temperature and restarts @ 55° F. **Actual temperature affected by relative humidity, solar effect, etc.
